CASE STUDY

Global biopharma company who discover, develop, and deliver innovative medicines that help patients with serious diseases.

OVERHAUL IN ACTION

How Overhaul helped a fortune 500 pharma client overcome logistical challenges and discover insights that helped them save lives.

Q&A / PANEL

Real-time Logistics visibility & Risk-Management For Supply Chains

Our Vision:

To empower our customers to have world-leading supply chains

Our Mission:

Enhance visibility, security, safety, and integrity by transforming data into actionable outcomes

MEET OVERHAUL

REAL-TIME TRANSPORTATION VISIBILITY

UNRIVALLED RISK MANAGEMENT, COMPLIANCE,

THEFT PREVENTION & RECOVERY

...ALL WITH ONE PROVIDER

ABOUT THE CLIENT

- Commodity: General
 Pharmaceuticals, Clinical Trials, and
 Personalized Medicine
- Regions: Global
- Develop and delivering innovative medicines for patients with serious diseases.

demonstrate the ability to display multiple shipment information with a user-friendly interface. The industry standard terms were used by the platform (example: shipment mode, events, etc) to display the data. Users were able to get the latest information and manage the shipment, as the shipment moved through various stages. Exception based alerts were generated by system, so that business users can address critical issues.

BMS Case Study

Challenge

- Lack of global shipment visibility
- Disparate tracking data from multiple sources
- Active monitoring of in-transit risk alerts

Solution

- Visibility (RTTVP, TTS)
- Risk
- Compliance

Results

GAINED GLOBAL VISIBILITY

Product-level condition monitoring for critical medicines and therapies. Real time visibility approach to serve both security and logistics needs.

EXCEPTION MANAGEMENT & VENDOR CONNECTION

3PL, device & carrier integrations.

Automated filtering of risk of 20,000+ risk notifications for exception management

IMPROVED QUALITY COMPLIANCE

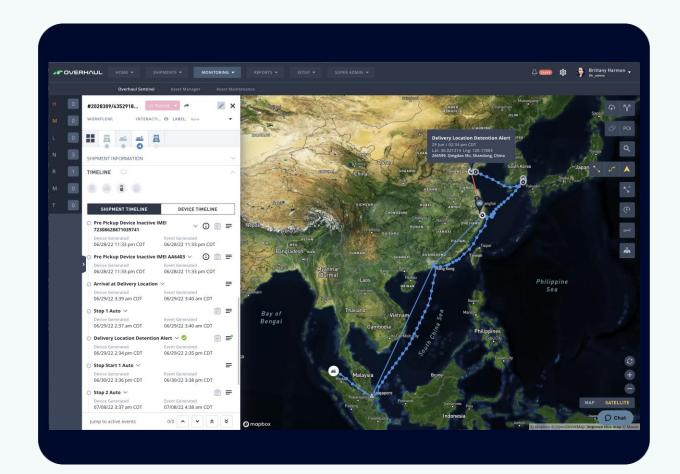

Real-time TTS updates ensuring products remain in compliance and improving quality.

Data Quality & Timeliness compliance of carrier/ FF

Real-Time Risk Management

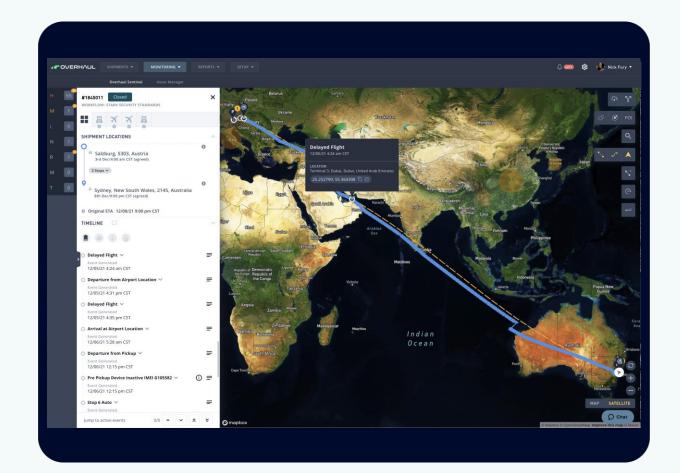

- Instant access to real-time tracking of shipments and orders with dynamic ETAs
- Improve network on-time performance with data-driven insights to support planning, reduce dwell times and mitigate risk.
- Increase visibility for multi-modal shipment including geofencing and situational awareness to support exception management.
- Custom workflows notifications via email, text, or push notification to improve stakeholders' communication.

Real Time Transportation Visibility

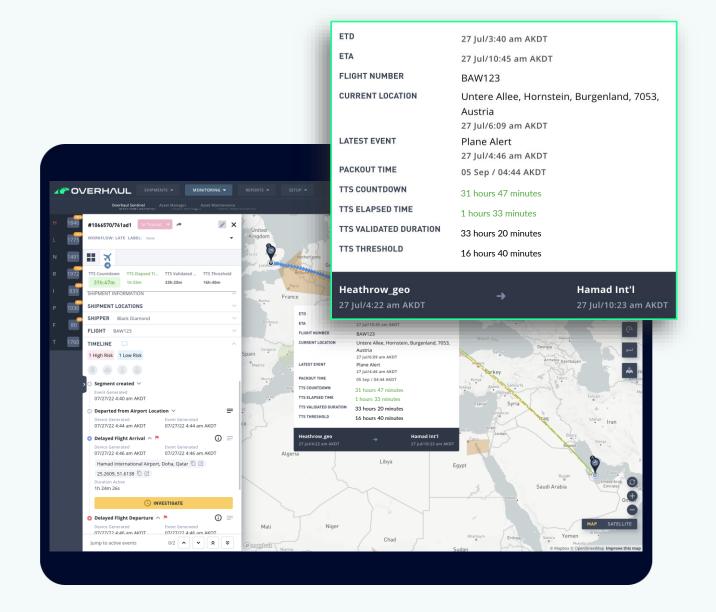

- Manage by exception with predictive ETAs and improve On-Time Performance
- Improve inventory management with up and downstream insights
- Gain control of managing supply chain disruptions and mitigate impact
- Decrease dwell time, detention and demurrage fees with container visibility and port intelligence

High-Value, Time & Temperature Sensitive

- Temperature, Shock & tilt monitoring in real time
- Supply Chain Security & integrity
- GPS location & devices for door open alerts
- Count down clock for remaining compliance time with alerting and real time insights
